DATE MAILED: 11/13/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 10/676,943	<b>Applicant(s)</b> OCHIAI ET AL.	
	<b>Examiner</b> Nam Huynh	<b>Art Unit</b> 2617	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 01 September 2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

- 4) ☒ Claim(s) 1-6 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-6 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

#### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

#### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

#### Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/08)  
Paper No(s)/Mail Date \_\_\_\_\_.
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_\_.

## DETAILED ACTION

### *Response to Amendment*

This office action is in response to amendment filed on 9/1/2006. Of the original claims 1-6, claims 1-3 and 5.

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brandt (US 2003/0146821) in view of Giesler (US 6,992,565), and in further in view of Guindulain Vidondo (US 6,779,719).

A. Regarding claims 1-2, and 5-6, Brandt discloses a system for providing goods or services that includes a goods or services provider and an electronic device that is typically a cellular telephone that includes a RFID module affixed to the inner surface of the rear cover carried by a user (pages 1, 2, paragraphs 14-16). The goods/service

Art Unit: 2617

provider (second computer) and the RFID module (first computer) both include input/output units (first and second transceivers) that permit communications of data between the two devices (page 2, paragraphs 18,19, 23). In operation of the invention, when the user of the electronic device wishes to obtain goods or services from the provider, the user positions the electronic device so that its input/output unit is adjacent to the input output unit of the goods/services provider and uses the electromagnetic field emitted to transfer data from the memory of the electronic device to the goods/service provider (page 2, paragraph 23). The data can be read to be monetary information for the user because it may identify the electronic device that is associated with a charge account for receiving goods/services from the provider.

However, Brandt does not explicitly disclose that the RFID module and the goods/service provider use the human body to serve as an electric field to push a conductive pusher, with an insulator, in order to receive goods or service from the provider. Giesler discloses an electronic communications system for a vehicle, including a base station (second transceiver), which is accommodated in the vehicle, and at least one portable data carrier (first transceiver), which is arranged to exchange data signals with the base station (abstract). The data carrier comprises a first data signal processing circuit arranged to receive and/or transmit the data signals from and to the base station (column 4, lines 26-28). The base station comprises a second data signal processing circuit that is arranged to receive/transmit the data signals from and to the data carrier (column 4, lines 35-37). In an embodiment of the invention with reference to figure 2, an electrode of the data carrier (item 4) is coupled to the body of

Art Unit: 2617

the user (item 9) (inducing an electric field in a human body). Via displacement currents (item 12) within the body of the user (a human body serving as an electric-field propagating medium), the data signals from the data carrier are extended to the hand of the user. The data signals are then transferred to the base station (item 1) via an electrode (item 60) (conductive pusher), which is insulated (column 7, lines 4-12) when the user touches (presses) on it with his/her hand (column 5, lines 10-43). Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the invention of Brandt and couple the RF module to the body of the user and allow data to be communicated between the RF module and the goods/service provider when the user touches a button on the goods/service provider, as taught by Giesler, in order to allow a user to keep the electronic device in or under his/her clothing or in a purse or the like (Giesler column 3; lines 7-9).

The combination of Brandt and Giesler does not explicitly disclose a switch to transfer press information to the goods/service provider (second computer). Guindulain Vidondo discloses a combined system of automatic selling of products and services that comprise a plurality of push buttons (figure 1, item 5) that correspond to a product (column 4, lines 15-17). Therefore it is obvious to one of ordinary skill in the art at the time the invention was made to include push buttons that correspond to a product, as taught by Guindulain Vidondo, in the goods/service provider of the combination of Brandt and Giesler, in order to inform the goods/service provider of the desired/selected product that the user wants to obtain in addition to the data to complete or initiate the financial transaction.

Art Unit: 2617

B. Regarding claim 2-4, it is further obvious that in the combination of the three inventions described above, that each of the plurality of buttons on the goods/service provider may have a input/output unit (Brandt) with a conductive portion (Giesler) and a switch/selecting portion that identifies itself (Guindulain Vidondo).

***Response to Arguments***

4. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nam Huynh whose telephone number is 571-272-5970. The examiner can normally be reached on 8 a.m.-5 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, George Eng can be reached on 571-272-7495. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
